# ABOUT

A T E E & C O .

## **About the Company**

Founded in 1985, Atee & Co. has established itself as a leader in Pakistan's refrigerant industry. Over nearly four decades, we have pioneered the bulk import of all major refrigerants and blends, providing comprehensive solutions for a wide range of refrigeration systems. As the leading quota holder for CFC, HCFC, and, more recently, HFC and HC refrigerant solutions in the Pakistani market, we have earned a reputation as a trusted name in the HVACR (Heating, Ventilation, Air Conditioning, and Refrigeration) sector.

# ABOUT

A T E E & C O .

## **About the Company**

Our commitment to quality, innovation, and customer satisfaction has made us the preferred supplier for some of the region's most prestigious OEMs (Original Equipment Manufacturers) and government clients.

In addition to our business achievements, Atee & Co. is dedicated to environmental sustainability. We have been an active participant in the Montreal Protocol agreement, working closely with the Ministry of Climate Change to protect the ozone layer and contribute to global efforts in combating climate change.

# ABOUT

A T E E & C O .

## **About the Company**

Atee & Co. has a strong presence across Pakistan, with our head office located in Karachi and branch offices in Lahore, Peshawar, and Sukkur. Additionally, we have a comprehensive distribution network that spans the entire country, supported by a wide network of retailers and distributors.

# ABOUT

A T E E & C O .

## **About the Company**

At the heart of our operations lies a deep commitment to providing high-quality, reliable products for both domestic and international markets. Over the years, we have expanded our product range to include a variety of refrigerant gases, copper tubes, chemicals, and other HVACR-related components. Our business model focuses on offering end-to-end solutions, including importation, distribution, and manufacturing, all aimed at meeting the dynamic needs of the industry.

# Vision

To be the leading provider of refrigerants and HVACR components globally, embracing innovation, sustainability, and customer-centric growth for a better tomorrow.

A T E E & C O .

# Mission

To lead the HVACR industry by providing high-quality, reliable products and innovative solutions, ensuring customer satisfaction and sustainable growth. To provide customer-focused solutions with excellence, integrity, and efficiency at the core of every service we offer.

A T E E & C O .

# Our Goals

Ensure 100% customer satisfaction through consistent quality and reliability in services.

A T E E & C O .

**01**

Continuously improve processes and adopt innovative technologies to enhance service delivery.

**02**

Establish and maintain a leading position in the industry by offering superior products and services.

**03**

Uphold the highest quality standards to ensure safety, reliability, and customer confidence in all offerings.

# HISTORY

## History

Mr. Shaikh Abdul Wajid commenced refrigerant gases and parts business with the title of Cool Corporation in 1976. In 1985, he established another new company namely Atee & Co. And in the year 2016, a manufacturing company named S.A.K. industries. has been established. M/S Atee & Co. and SAK Industries are ISO Certified (ISO 9001, 14001, 45001) . Atee & Co has been awarded one of the largest quantity quota allowance due to its performance by the Ministry Of Climate Change.

# Our Milestones

1985

- Founded with a vision to lead the refrigerant and HVACR market in Pakistan.

1987

Established ourselves as pioneers in the bulk supply of CFCs and HVACR components, earning trust within the industry.

1990

Strengthened our logistics capabilities with an advanced decanting station and warehousing facilities in Karachi.

2011

Launched our state-of-the-art manufacturing plant for refrigerator condensers, achieving international quality standards.

# Our Milestones

Expanded product range to include to variety of refrigerants, copper tubes, chemicals, and compressors, diversifying our offerings.

Built a strong nationwide presence with branches across major cities and an international office in Dubai, UAE, serving prestigious clients, including OEMs and government institutions.

# Our Products and Services

## Refrigerants

- Bulk supply of CFCs, HCFCs, and HFCs (Hydrofluorocarbons)
- Refrigerant decanting services in various packaging sizes (20-ton ISO tank, 1,000 kg, 60 kg, and 13.6 kg cylinders)

## Air Conditioning Compressor

- Wholesale supply of high-quality compressors for residential and industrial air conditioning units

# Our Products and Services

## Copper Tubes

- Our Products and Services Import and distribution of premium copper tubes for use in refrigeration and air conditioning systems.

## Refrigerator Condensers

- Manufactured in-house to meet international standards, our condensers are integral to refrigeration systems and air conditioning units.

# Our Products and Services

## Chemicals & Other Components

Offering a variety of refrigerant-related chemicals and HVACR components, ensuring efficiency and long-lasting performance. We offer a comprehensive range of HVAC and polyurethane-related products for the air conditioning industry, including:

1. R141b
2. Polyols
3. MDI
4. Pre-mixed Polyols\

## Our Facilities

Atee & Co. operates with an advanced decanting station located in Karachi, which enables us to offer customized bulk refrigerant packing to suit the specific requirements of our clients. We handle large-scale bulk refrigerant orders, offering flexible packaging options, including ISO tanks (20 tons), 1,000 kg containers, and smaller 60 kg and 13.6 kg cylinders for retail and distribution purposes.

Our manufacturing facility is equipped with the latest technology to ensure that our refrigerator condensers meet or exceed international performance standards. This factory allows us to stay competitive while offering customers high-quality, reliable products tailored to meet their diverse needs.

In addition, our extensive warehousing and distribution network across Pakistan ensures that we are always ready to meet the demands of our customers. Whether clients need large quantities of refrigerants or specialized components, we ensure swift and reliable deliveries, no matter the scale of the order.

# Global Sourcing and Imports

To provide the best products to our customers, Atee & Co. imports from renowned manufacturers in Spain, Italy, the United States, the United Kingdom, China, Japan and Korea. This diverse sourcing network guarantees that we offer a wide range of high-quality products designed to meet the rigorous standards of the global market.

## Vision for the Future

As Atee & Co. moves into its next phase of growth, our vision is clear: to continue to be the leading provider of refrigerants, and HVACR components in Pakistan while expanding our international footprint. Over the next 30 years and beyond, we aim to continually evolve our offerings, develop stronger partnerships, and embrace innovative technologies that shape the future of the HVACR industry. Our commitment to sustainable growth, customer-centric services, and operational excellence will ensure we remain at the forefront of the industry.

# Our Commitment to Quality

Atee & Co. is committed to maintaining the highest standards of quality and customer service. We are proud of our robust Quality Management System, which ensures that every product we supply, from refrigerants to compressors and condensers, is thoroughly tested for performance and safety. Our ongoing investment in technology and training ensures that we deliver products that are not only high-performing but also environmentally responsible.

# Serving Prestigious Clients

Our customer base includes some of the most reputable companies in the HVACR industry, including OEMs, contractors, and government institutions. Over the years, we have earned a reputation for trustworthiness, reliability, and superior customer service. Whether we are working with large-scale government projects or providing materials for local contractors, our focus remains on delivering value-added solutions that meet both the technical and commercial needs of our clients.

# Overview of the Refrigerant Industry

- The refrigerant industry focuses on the development and supply of substances used in cooling and refrigeration processes. Historically, refrigerants were chemical compounds like chlorofluorocarbons (CFCs) and hydrochlorofluorocarbons (HCFCs), but due to their environmental impact, such as ozone depletion, the industry has seen a significant shift toward more sustainable and eco-friendly alternatives like hydrofluoroolefins (HFOs), hydrofluorocarbons (HFCs), and natural refrigerants (ammonia, CO<sub>2</sub>, and hydrocarbons).

# Market Demand and Applications

- Refrigerants are essential to several industries:
- Residential and Commercial HVAC: Used in air conditioning systems to provide indoor climate control.
- Industrial Refrigeration: Applied in large-scale refrigeration systems, especially in food processing, storage, and transport.
- Automotive HVAC: Refrigerants are used in vehicle air conditioning systems.
- Pharmaceutical and Medical Applications: Required for the storage of temperature-sensitive products like vaccines and certain drugs.
- Transport Refrigeration: Critical for transporting perishable goods, including food and pharmaceuticals.

The demand for refrigerants is driven by the expansion of industries such as retail, food distribution, and the increasing adoption of air conditioning in regions with rising temperatures.

# Trends in the Industry

- **Regulatory Changes and Environmental Impact:** Global agreements, such as the Montreal Protocol and the Kigali Amendment, have set strict targets for phasing out ozone-depleting substances (CFCs and HCFCs) and reducing the use of high global-warming-potential (GWP) refrigerants like HFCs. This has led to innovation in alternative refrigerants with lower environmental footprints.

**Sustainability Focus:** A growing emphasis on sustainability has prompted companies to develop refrigerants with lower GWP, as well as systems that increase energy efficiency.

# Technological Advancements

- Innovations in refrigerant blends, system designs, and energy-efficient technologies are propelling industry growth. For instance, refrigerants like R-32, HFO-1234yf, and CO<sub>2</sub> are gaining traction due to their lower environmental impact.
- Circular Economy: There is also an increasing focus on recycling and reclaiming refrigerants to reduce waste and improve sustainability across the supply chain.

# Challenges

- **Regulatory Compliance:** Keeping up with ever-evolving environmental and safety regulations across different markets is a significant challenge.
- **Sourcing Raw Materials:** The production of refrigerants requires specific chemicals, which are subject to supply and price fluctuations.
- **Safety Concerns:** Some refrigerants can be hazardous if not handled correctly, which makes worker training and safety protocols a key focus.
- **Transition to Low-GWP Solutions:** As the industry moves toward lower-GWP refrigerants, there are challenges in ensuring compatibility with existing systems, as well as concerns regarding the cost and performance of new alternatives.

# Company's Role and Competitive Advantage

- A company in the refrigerant industry may focus on specific aspects such as:
- Manufacturing and Supply Chain: Producing refrigerants in large volumes, ensuring high purity, and distributing them globally.
- Innovation: Developing environmentally friendly refrigerants or enhancing refrigerant blends to cater to both regulatory requirements and market needs.
- Customer Service and Support: Offering installation, maintenance, and recycling services, particularly in the HVAC and industrial refrigeration sectors.
- R&D: Leading research into developing next-generation refrigerants and energy-efficient systems to support growing environmental demands.
- Competitive advantage can stem from technological expertise, a strong understanding of global regulatory trends, sustainability initiatives, and customer-centric services.

# Market Outlook

- The refrigerant industry is expected to continue growing, driven by the increasing demand for refrigeration systems in emerging markets and the global transition to more eco-friendly refrigerant options. This growth is tempered by regulatory challenges and evolving environmental standards. The market will likely see further consolidation, technological innovation, and investment in green solutions.

REFRIGERANTS

**R407-c:**  
R407c is a mixture of hydrofluorocarbons used as a refrigerant in a zeotropic blend of difluoromethane, pentafluoroethane and 1,1,1-trichloroethane.

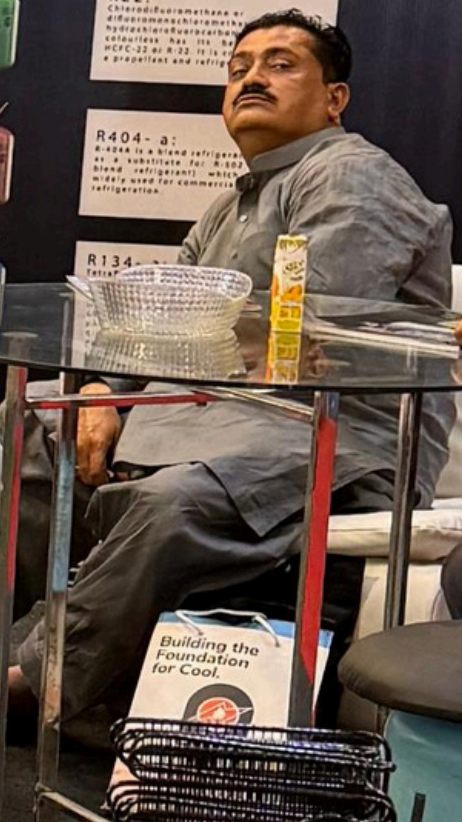

**R-600 a:**  
R600a is a refrigerant grade isobutane, a natural, "heat in kind" refrigerant suitable for use in a range of refrigerative applications. The use of R600a is increasing due to its low environmental impact and excellent thermodynamic performance and it is now the refrigerant of choice in domestic and small commercial refrigerators.

**R410-a:**  
R410a is a zeotropic, but near azeotropic mixture of difluoromethane (CH<sub>2</sub>F<sub>2</sub>, called R-125) and pentafluoroethane (C<sub>2</sub>HF<sub>5</sub>, called R-132i), which is used as a refrigerant in air conditioning applications.

**R22:**  
CHloro-difluoro-methane or dichlorodifluoromethane hydrochlorofluorocarbon refrigerant. Has its boiling point at 40°C. It is a propellant and refrigerant.

**R404-a:**  
R-404a is a blend refrigerant of a hydrocarbon. For a 50/50 blend refrigerant which may be used for commercial refrigeration.

**R134a:**
